

Reading Wonders

Adding Students thru Grade Search and Manual Search

Log into Reading Wonders > click on Teacher Edition > Under Manage and Assign click on the Class

Details tab. Then click on the  button.

When the “Add Students to Class” window pops up make sure that All Classes and All Content are selected for “Select From Class” and “Select Content”.

Then go down to “Select Grade Level”.

Select your grade then click search.

Click on the arrow next to “Last Name” so that it will put the last names in alphabetical order. Then put a check mark next to each student’s name that is in your class. Then click Save.

Reading Wonders Tech Support has stated that the Maximum # of student names that will show up under “select Grade” is 500 names. So anyone not showing up under the Grade level search need to be searched for one at a time. To search for student manually just type in their last name (you can type in both names if you want) then click search. Put checkmark next to your student’s name. Then Click Save.

	LAST NAME	FIRST NAME	MIDDLE INITIAL	USER NAME
<input checked="" type="checkbox"/>	zzwork	One		FTOZZWORK
